PREFACE

The objectives of the Pakistan National Bibliography are to list every new work published in Pakistan, to describe each work in detail and to give the subject matter of each work as precisely as possible. The 1974 volume of the Pakistan National Bibliography covers Pakistani Publications in English, Urdu, Sindhi, Pushtu, Panjabi, Baluchi, Persian, Arabic and other languages received in the Delivery of Books and Newspapers Branches of the National Library of Pakistan at Islamabad and Liaquat Memorial Library, Karachi under the Copyright Ordinance.

The following classes of publications have been excluded:-

- (a) The keys and guides to text-books and ephemeral materials; such as, publicity pamphlets etc.
- (b) Periodicals and newspapers (except the first issue of a new periodical and the first issue of a periodical under the new title.)
- (c) Maps.
- (d) Musical scores.

Arrangements:

The arrangement of Bibliography is subject wise. The classification of subjects is based on the 17th edition of the Dewey Decimal Classification. Cataloguing practices follow the Anglo-American Catalogue rules, 1967. The transliteration of entries other than English into Roman script and the Cataloguing of Pakistani names is generally based on the recommendations as made by Dr. Anis Khurshid in his publication entitled "Cataloguing of Pakistani names". The full information about a book is given in the Classified Section. The main entries have been made under the name of the authors or corporate bodies responsible for the work. It includes, in addition to the author's name, the full title, the place of publication, the publisher, the year of publication, the number of pages, the kind of illustrations, the price, etc. The language of the book is denoted by symbols which are given at the left hand bottom corner of each entry. The Accession Number of each book is shown against each entry in parentheses followed by the words; I-for Islamabad and K-For Karachi, and NLP for the National Library of Pakistan. A List of Abbreviations and language Symbols used in the Bibliography is given after the Preface. A List of prominent book sellers and publishers in Pakistan appears at the end of the Index.

Index:

The index contains entries or reference entries under authors, titles, editors, translators, compilers, series and subjects in one

alphabetical sequence. In certain cases, the entries have also been made under the name of the institution responsible for bringing out the publication.

The entry under the author gives, in an abbreviated form, most of the information to be found in the entry in the Classified Section so that, for most purposes, it is not necessary to refer back to that entry when author of a book is known. If, however, a fuller description is required, the entry in the Classified Section - which gives the fuller description can be found by means of the decimal code number given at the end of the author entry.

If you wish to know what books have been published on a particular subject, it is necessary to consult the Index under the name of the subject. Here again you will find a decimal code number which must be sought in the Classified Section.

Karachi, the
31st July, 1978.
